

## CAEP ANNUAL MEASURES Employer Survey

EMPLOYER SURVEY 2024-2025

CAEP STANDARDS: R4.2

InTASC STANDARDS: 1, 2, 4, 5, 6, 7, 8, 9, 10

NH DOE 610.02: (a) (1-2), (b) (1-2), (c) (1-3), (d) (1-2)

### Administration and Purpose

The Employer survey is an EPP-created survey measuring employers' satisfaction with EPP graduates who are now beginning teachers. The survey measures the perception of employers of graduates' abilities regarding the 10 InTASC standards. The survey's components and statements are tagged and aligned to CAEP, InTASC, and New Hampshire standards and reflect the EPP's beliefs. The items are stated in terms of behaviors and produce actionable results. The data results from the survey are used to assess the quality of the teacher education programs and the way programs have prepared candidates for their roles as beginning teachers. The EPP uses the results to improve the quality of the teacher preparation and the operational effectiveness of the EPP. The Employer Survey is administered every year. Employers are sent the survey on-line or, if on campus at meetings, they are asked to respond to it on paper. This year we made a substantive change to how we released the employer survey. In years past we asked administrators: "As you complete this survey, please consider SNHU graduates who are beginning teachers (someone with three or fewer years of teaching experience)". This year we sent individualized emails listing our recent graduates that were hired by their school. The surveys were completed anonymously with individual responses kept confidential and aggregated with all other responses for reporting. The aggregate data are shared with faculty and other stakeholders at meetings and retreats. The employer survey is conducted every year.

For 2024-2025 there were 11 responses out of 40 employers who were administered the survey (28% response rate). This is an improvement over the last two years of reporting (10% response rate in 2024, 20% response rate in 2023).

### Content of the Instrument

The content of the employer survey is directly aligned to the InTASC standards. In addition, the survey includes an open Comments section.

### Scoring

The survey is scored by calculating means from the following choices: "unprepared", "somewhat prepared", "adequately prepared", and "well prepared". Scoring is done in the following manner: "unprepared":1; "somewhat prepared": 2; "adequately prepared":3; "well prepared":4. An item is considered acceptable when the mean is "3" or above. An item is considered an area for improvement when the mean is less than "3".

**Validity and Reliability**

According to the CAEP Revised 2022 Standards Workbook (page 82) surveys do not need these attributes.

**How likely would you be to hire another SNHU Graduate in the future?**

2024-2025— 90% of responders (10 out of 11) noted that they would definitely hire another SNHU graduate. The remaining responders 10% (1 out of 11) said they would probably hire another SNHU student in the future.
